

Solutions

Networking: wireless surveys

As a proud **Ekahau** partner, Truis can provide predictive and physical wireless (WiFi) site surveys as part of our networking services. Wireless surveys include the creation of 'heat maps' to visualise **signal strength, wireless channels and access point locations.**

Networking options

Predictive wifi plan

- Wireless signal modeling based on customer floor plans
- Placement plan designed to maximise access point coverage
- Creation of predictive heat maps, including:
 - Signal strength
 - Coverage
 - Channel planning
 - Access point location

Standard site survey

- On-site collection of real-life wireless signal data
- Site survey report, including:
 - Signal strength
 - Coverage
 - Channel planning
 - Interference
 - Detectable access points
 - Signal to noise ratios

Service price table

SKU	Service	Price
SVCS-PSFP0906	Predictive wifi plan - up to 2,000 square metres	\$0 (No charge)
SVCS-PSFP0907	Predictive wifi plan - over 2,000 square metres	\$ PoA
SVCS-PSFP0905	Standard wifi site survey	\$2,000 per 2,000 square metres

Note: All prices on this document are in \$AUD, excluding GST
The standard WiFi survey price does not include flights, travel and accommodation where applicable
